Instructions for Use
Hidden Needle Cover
For use with HumatroPen® (6 mg, 12 mg, or 24 mg)

What you need to know about the Hidden Needle Cover
Read this Instructions for Use for the Hidden Needle Cover before you use it. There may be new information. This information does not take the place of talking to your healthcare provider about your or your child’s medical condition or treatment.

Your healthcare provider should show you how to use the Hidden Needle Cover with the HumatroPen the right way before you use it for the first time. Ask your healthcare provider if you have any questions. If you are having problems using the Hidden Needle Cover with the HumatroPen (6 mg, 12 mg or 24 mg) call Lilly at 1-800-545-5979 or go to www.Humatrope.com.

The Hidden Needle Cover allows you to give your injection with the needle hidden from view. Be sure the HumatroPen is set up by following the steps in the HumatroPen Instructions for Use.

What kinds of needles can be used with the Hidden Needle Cover?
- Pen needles are not included. You may need a prescription from your healthcare provider to get the needles from your pharmacist.
- Becton, Dickinson and Company pen needles are recommended for use with the HumatroPen.
- Use of the Hidden Needle Cover with your HumatroPen is optional.
- When using the Hidden Needle Cover with your HumatroPen, you must use a needle length of 5 mm or longer.
- Ask your healthcare provider which needle is best for you.

1. Be sure the HumatroPen cap is removed. Remove the paper tab and attach a new needle to the Cartridge, and remove the outer needle cap and inner needle cap. Read Section 2A and 2B of the HumatroPen Instructions for Use for detailed instructions to set-up the HumatroPen. Read Section 2C of the HumatroPen Instructions for Use for detailed instructions to attach the needle. Follow your healthcare provider’s instructions on the safe handling of needles.

2. Confirm the Hidden Needle Cover is in the locked position. If it is not locked, turn the slider so that the guide post is in the guide channel, in the locked position, as shown. Be sure to turn the slider to the locked position, do not push the slider. The Hidden Needle Cover should now be in the locked position. It is important to make sure the slider is in the locked position to help avoid accidental needle sticks in the next step.
3 Insert the Pen with attached Cartridge and needle straight into the **locked** Hidden Needle Cover by pushing firmly until it stops. **Do not** block the opening of the Hidden Needle Cover with your hand or fingers, while performing this step.

4 Unlock the Hidden Needle Cover by turning the slider until the guide post is in the guide channel, in the unlocked position as shown. To avoid accidental needle sticks, be careful not to push the slider in after it is unlocked.

5 Turn the dose knob to the prescribed dose. If you turn past the prescribed dose, you can correct the dose by turning down to the right dose. The dose knob clicks as you turn it. **Do not** dial your dose by counting clicks because you may dial the wrong dose.

Read the HumatroPen Instructions for Use: Step 3C “Dial and inject the dose” for detailed instructions on how to give your injection.

6 Injections can be given in the following areas:
- Abdomen: above, below, or either side of the belly button (navel)
- Front of the upper thighs
- Upper, outer buttocks
- Back of the arms above the elbow and below the shoulder.

Talk to your healthcare provider about the right way to use HumatroPen, the right areas to give your injection, and injection site rotation.

7 Insert the needle at a 90 degree angle as shown by your healthcare provider. The slider will move over the Hidden Needle Cover Body as the needle is inserted.

Place your thumb on the injection button, then slowly and firmly push the injection button until it stops moving. Continue to hold the injection button for 5 seconds, then remove the needle from the skin. The Hidden Needle Cover will automatically lock as you remove the needle from the skin.

Check to make sure you see a **0.00** in the dose window. This means that the complete dose was injected.

**Important Note:**
It is possible to set a dose larger than the amount of HUMATROPE left in the Cartridge. At the end of the injection, the number in the dose window should be **0.00**. If it is not, this is the amount of HUMATROPE you **did not receive**. Write this number down.

Remove the Hidden Needle Cover, needle and empty Cartridge from the Pen. Insert a new Cartridge, attach a new needle, and remove air from the new Cartridge. Attach the Hidden Needle Cover.
Complete your dose by injecting only the amount you did not receive. If you still do not think you received your full dose, do not take another dose. Call Lilly at 1-800-545-5979 or your healthcare provider for assistance.

8 After you have completed your injection confirm that the Hidden Needle Cover has returned to the locked position.

Carefully pull the Hidden Needle Cover straight off to remove it from the Pen.

Note: If the Hidden Needle Cover did not return to the locked position, you can still remove the Hidden Needle Cover from the Pen by pulling it straight off.

9 Read Step 3D “Remove and dispose of the needle” in the Instructions for Use for the HumatroPen.

10 Read Step 3E “Store Pen and Cartridge for next use” in the Instructions for Use for the HumatroPen.

11 Read “Commonly asked questions” in the Instructions for Use for the HumatroPen.

12 Read “Disposing of used needles” in the Instructions for Use for the HumatroPen.

This Instructions for Use has been approved by the U.S. Food and Drug Administration.
